Thanks to the support of our Annual Fund donors, Princeton HealthCare System is able to provide exceptional care to patients and families.

The University Medical Center of Princeton was recognized by The Joint Commission as one of the Top Performers on Key Quality Measures in the United States during 2010. It is the only hospital in this region, and one of only 12 in New Jersey to earn this recognition. UMCP is being recognized for its performance in the following areas:

- Heart Attack
- Heart Failure
- Pneumonia
- Surgical Care

UMCP was named a 2010 Top Hospital (one of only 58 acute care hospitals in the country) by Leapfrog Group—an organization dedicated to improving the safety, quality, and affordability of health care.

UMCP has received the HealthGrades Maternity Care Excellence Award for the fourth consecutive year, ranking among the top 5 percent of hospitals in the United States for maternity care.

UMCP and The Children's Hospital of Philadelphia (CHOP) have partnered to enhance pediatric services available at UMCP at all levels of hospital care, including Pediatric emergency consultation, Inpatient pediatric care, and Neonatal care. Through this partnership, physicians and other health professionals from CHOP work on-site with the physicians and clinical staff of UMCP to provide exceptional care for your child. CHOP is one of the leading pediatric hospitals and research facilities in the world.

The new University Medical Center of Princeton at Plainsboro project has significantly benefited our region's economy. During the construction, more than 2,600 jobs have been created.

When the site reaches full build-out, a total of 3,600 people will be employed full time on site. The campus, when fully developed, will yield assessment and property tax revenues that are three times those of the former occupant, FMC Corporation. The full economic impact of the project is estimated to exceed \$1 billion.

In addition to the acute-care hospital, Plainsboro residents, employees, and visitors will benefit from a modern medical office building attached to the hospital, a world-class education center, a health and fitness center, long-term acute care, an outpatient pediatric pavilion managed by The Children's Hospital of Philadelphia, and a beautiful 32-acre public park.

For more information on the project visit www.princetonhcs.org/designforhealing or call 609.497.4190.

In May 2012, Princeton HealthCare System (PHCS) will open the doors to the new **University Medical Center of Princeton at Plainsboro (UMCPP)**, an innovative hospital that will be the centerpiece of an entire campus at Route One and Plainsboro Road devoted to health care. As residents of Plainsboro, employees of Princeton HealthCare System, and PHCS donors, we are excited about our new hospital and invite you to join us in supporting outstanding medical care, closer to home.

Allison Charles

Director of PHCS Laboratory, at the site of the lab at the new UMCPP

“As a member of UMCPP’s Operational Readiness Team, I am responsible for ensuring that the lab in the new hospital is fully functional upon opening while diagnostic services continue seamlessly at the current facility during the transition. Particularly exciting to me are all the new capabilities that will enhance our already

outstanding service — from a state-of-the art computerized pneumatic tube system to speed transmission of specimen for analysis to barcode label printing at bedside to improve patient safety. During the 12 years I’ve lived in Plainsboro, I’ve been excited to see the amazing transformation that has taken place in our community and proud to play a role in a facet of its development that is so important for the health and well-being of our families and friends. With my recent gift to PHCS, I have made a personal investment to help ensure outstanding care and services for our patients.”

Carolynn Bitzer

MSN, RN, APN, BC, FNP, CS, Clinical Nurse Educator

“I went into the nursing profession to make a difference in others’ lives. Through my work as a nurse educator in UMCP’s Oncology, Intensive/Critical Care, and Outpatient Infusion Units, and as an active member of the patient care team and participant on our Education and Orientation Committee in preparation for the move to the new hospital, I’ve had the privilege to fulfill this passion many times over. I feel fortunate to be involved in something as monumental as the new hospital project and proud to be among the employees and Plainsboro donors who have played a role in making it happen.”

Adriana Cadavid

LCSW, Senior Primary Therapist, Princeton House Behavioral Health Women’s Program

“From a personal standpoint, the relocation of the hospital closer to my home and my work at the PHBH Women’s Program in North Brunswick is especially timely — my husband and I are expecting a child in a few months. Closer proximity to an outstanding hospital to address the health-care needs of my growing family, and the prospects of new opportunities for collaboration with different entities at the hospital make it gratifying for me to contribute, both financially and professionally, to this exciting enterprise.”
